Rationale for Recommendation.

Northern Arc Capital is showing a constructive recovery setup as the stock is trading around ₹285 and rebounding from the ₹272–282 support zone, indicating improving momentum after a recent correction. The stock is attempting to reclaim the ₹285 resistance area, and a sustained move above ₹285-287 could trigger fresh buying interest towards ₹305–310. The overall outlook remains positive, with ₹272 acting as the key support level for the bullish view.
