## Technical Picks

NIFTY 30 DEC 26050PE	
Reco Price	₹55
<b>CE Buy</b>	
Target Price	₹68
Stop Loss	₹45
Time Frame	ONE DAY

### Rationale for Recommendation

26050 PE was a good buy because Nifty weakened intraday and dipped below the 26,050 level, creating downside momentum. The index was trading in a consolidation range with support near 26,000–26,050, so when price moved toward that support and failed to hold above it, put premiums rose as downside probability increased. Technical levels and short-term bearish pressure made this put strike react quickly to the fall in the underlying.
